

# RF Tuner IC for DVB-H, DVB-T, DTMB, and CMMB

# **ADMTV102**

#### **FEATURES**

Single-chip synthesized tuner for dual-band mobile TV applications

Zero-IF single-conversion architecture eliminates need for SAW filters

Covers entire UHF Band IV/Band V (470 MHz to 862 MHz)

Typical AGC dynamic range: -102 dBm to 0 dBm

Low power consumption: 200 mW (UHF)

On-chip features include

Fast switching fractional-N PLL

Low phase noise and wide frequency range VCO

Bandwidth-adjustable low-pass filter

Integrated baseband VGA for direct connection to digital demodulators

Noise/linearity optimization through internal RF AGC loop Adjustable take-over point

I<sup>2</sup>C serial bus interface

Small 5 mm  $\times$  5 mm, 32-lead lead frame chip scale package (LFCSP)

Minimal external components

#### **FUNCTIONAL BLOCK DIAGRAM**

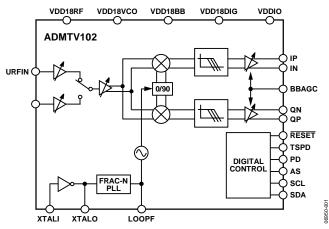

Figure 1.

### **APPLICATIONS**

DVB-H/DVB-T/DTMB/CMMB mobile and portable TV receivers UHF mobile and portable TV receivers

## **GENERAL DESCRIPTION**

The ADMTV102 is a highly integrated CMOS, single-chip, zero-IF conversion tuner IC for mobile TV standards, such as DVB-H, DVB-T, DTMB, and CMMB. The part includes an RF input band, UHF. The building blocks of the ADMTV102 include LNAs, RF PGAs, I/Q downconversion mixers, bandwidth-adjustable low-pass filters, baseband VGAs, a VCO, and a fractional-N PLL. The on-chip low phase noise VCO, along with the high resolution fractional-N frequency synthesizer, makes in-band phase noise low enough for mobile TV applications.

The ADMTV102 supports dual-band mobile TV standards with low power consumption, such as 200 mW for DVB-H. Using a small, Pb-free, 5 mm  $\times$  5 mm 32-lead LFCSP, the ADMTV102 is an ideal solution for highly integrated dual-band mobile and portable applications where low power consumption is critical. The part has an I<sup>2</sup>C\* serial bus interface. Applications for the ADMTV102 include DVB-H, DVB-T, DTMB, and CMMB.

For more information on the ADMTV102, email Analog Devices, Inc., at Mobile\_TV\_support@analog.com.

ADMTV102
NOTES
Purchase of licensed I <sup>2</sup> C components of Analog Devices or one of its sublicensed Associated Companies conveys a license for the purchaser under the Philips I <sup>2</sup> C Patent Rights to use these components in an I <sup>2</sup> C system, provided that the system conforms to the I <sup>2</sup> C Standard Specification as defined by Philips.
