## MC74LCX16373

## Low-Voltage CMOS 16-Bit Transparent Latch

## With 5 V-Tolerant Inputs and Outputs (3-State, Non-Inverting)

The MC74LCX16373 is a high performance, non-inverting 16-bit transparent latch operating from a 2.3 V to 3.6 V supply. The device is byte controlled. Each byte has separate Output Enable and Latch Enable inputs. These control pins can be tied together for full 16-bit operation. High impedance TTL compatible inputs significantly reduce current loading to input drivers while TTL compatible outputs offer improved switching noise performance. A $\mathrm{V}_{\mathrm{I}}$ specification of 5.5 V allows MC74LCX16373 inputs to be safely driven from 5.0 V devices.

The MC74LCX16373 contains 16 D-type latches with 3-state 5.0 V-tolerant outputs. When the Latch Enable (LEn) inputs are HIGH, data on the Dn inputs enters the latches. In this condition, the latches are transparent, i.e., a latch output will change state each time its D input changes. When LE is LOW, the latches store the information that was present on the D inputs a setup time preceding the HIGH-to-LOW transition of LE. The 3-state outputs are controlled by the Output Enable ( $\overline{\mathrm{OEn}})$ inputs. When $\overline{\mathrm{OE}}$ is LOW, the outputs are enabled. When $\overline{\mathrm{OE}}$ is HIGH, the standard outputs are in the high impedance state, but this does not interfere with new data entering into the latches.

## Features

- Designed for 2.3 to $3.6 \mathrm{~V}_{\mathrm{CC}}$ Operation
- 5.4 ns Maximum $\mathrm{t}_{\mathrm{pd}}$
- 5.0 V Tolerant - Interface Capability With 5.0 V TTL Logic
- Supports Live Insertion and Withdrawal
- $I_{\text {OFF }}$ Specification Guarantees High Impedance When $\mathrm{V}_{\mathrm{CC}}=0 \mathrm{~V}$
- LVTTL Compatible
- LVCMOS Compatible
- 24 mA Balanced Output Sink and Source Capability
- Near Zero Static Supply Current in All Three Logic States (20 $\mu \mathrm{A}$ ) Substantially Reduces System Power Requirements
- Latchup Performance Exceeds 500 mA
- ESD Performance: Human Body Model > 2000 V; Machine Model > 200 V
- These are Pb -Free Devices*
